A sample of the product has been assessed with respect to CE-marking according to the Low Voltage Directive (2006/95/EC) and found to comply with the essential requirements of the Directive. The Standard(s) used for showing the compliance and the full details of the results are given in the Test Report as detailed below:

Standard(s)	Report No.	Report Issued Date
EN 60968:1990+A1:1993+A2:1999	ACT202392-I	September 26, 2011
EN 62031:2008	ACT202392-II	September 26, 2011

The holder of the verification is authorized to use this verification in connection with the EC declaration of conformity according to the Directive. The CE marking may only be used if all relevant and effective EC Directives are complied with. Together with the manufacturer's own documented production control, the manufacturer (or his European authorized representative) can in his EC Declaration of Conformity verify compliance with the Low Voltage Directive.
